

**S**  **FTWRX**  
GENERATIONS BEYOND THE COMPETITION

**THE COMPANY**

SOFTWRX is a leader in providing integrated solutions for accounting software, financial management, distribution, manufacturing, retail (POS), project accounting, inventory software, business analysis, and customer relationship management. We deliver deep access to decision-driving information, a rapid return on investment and expert, dedicated customer service.

SOFTWRX provides your organization with increased analysis and control capabilities by using a totally multi-user accounting system based on ISO and QS principals. Supporting multi-location warehousing/departmental locations, bar code scanners and printers, vpn support and thin client for your remote branch locations. Software customization may be obtained to tailor each package specifically for your organization. Many unique features are available throughout each system utilizing a “drill-down” topology in each inquiry. This allows the user to view all or specific transactions that pertain to the top level request.

**THE SOFTWARE**

Because SOFTWRX’s systems can efficiently perform in a cross-platform environment, we protect your hardware and lan/wan investment. We offer an integrated suite of solutions built on proven Business Solutions Enterprise Resource Planning (ERP) and MRP platforms with fully integrated customized modules designed to meet the specific requirements of ISO & QS procedures. Single source solutions from SOFTWRX begin with non-platform-dependent, feature-rich accounting software—solutions that are flexible, easily customized, scalable and portable. This gives you a single point of contact for all your business solution needs, from your back office accounting system to your industry specific solution to the Internet.

## THE APPLICATIONS

### GENERAL ACCOUNTING

Integrated applications help you efficiently manage inventory, order, and purchasing management; sales forecasting; e-commerce; and warehouse management. These applications connect directly with dozens of other business management systems to help you meet the diverse needs of your business, including accounting, CRM, human resources and payroll, supply chain management, manufacturing, and more.

### MANUFACTURING

SOFTWRX enables manufacturers to produce electronic requests for materials, dispatch those materials, and track inventory movements of all inventory including raw materials and work-in-process. Using wireless terminals and bar-coding technology, manufacturers are able to track inventory in real-time. A manufacturer has complete control and visibility of raw materials and work-in-process as it travels throughout the workflow. Coupled with our Preventive Maintenance Module, your company can reduce downtime while increasing machinery efficiency, productivity and most importantly, your bottom line.

### RETAIL AND POINT-OF-SALE

Our highly functional Point-of-Sale (POS) Module works effectively in off-line and on-line environments and helps connect remote retail locations directly to your main system in a LAN/WAN VPN environment. These modules combine seamlessly with the Order Entry and Invoicing Module to give you the Retail Industry Solution that will make your organization stand apart from the competition.

### CONSTRUCTION

Job Costing System will track every phase of your projects whether you are a construction company or a manufacturing company. The “Bottom Line” is knowing what your accumulate cost is in regards to the estimated profitability of your project or manufacturing process. Cost is accumulated into individual categories within each job or phase. When integrated with other Accounting Modules, transactions are allocated to individual phases in your process.

### EDI COMMUNICATIONS

With more than 15 years of experience with EDI, SOFTWRX brings a comprehensive set of functions, seamless integration with Sales Order and Inventory, and dedicated attention to setup and support. Assistance is also available in related areas including: catalog setup, product label and bar code printing and chargeback research.

### AUTOMATION

We have collaborated with international machine manufactures to capture process data from the machine directly to the supervisor’s personal computer. Therefore, there is a reduction in re-tooling time and loss of productivity. This results in a more even work-flow process.

### MEDICAL BILLING WITH MED-CLAIMS PRO

Keeping up in today’s rapidly changing HIPAA and other institutional requirements can hinder your normal business operations. MedClaimsPro medical billing software provides the power and flexibility you need to speed up and ease medical billing, patient scheduling and all practice management tasks. For access to any financial and patient data, MedClaimsPro provides quick, ready-to-use, and fully-customizable reporting capabilities. The friendly and familiar Windows environment shortens the learning curve for new users. Both new and experienced users can quickly access each feature.

## THE SERVICES

SOFTWRX support, training and consulting services are a vital part of our total solution. Our services maximize the value of your initial investment and continue to add value as your business grows. SOFTWRX has partnered with thousands of independent resellers, consultants and developers to deliver products and services in your local area. To help our partners offer the best services to you, we offer the very best support and training of any vendor in our market. Together, SOFTWRX and your local partner work to answer all of your service needs.

## SOFTWRX ONLINE

A fully managed, per-user, hosted subscription service—an ideal alternative for companies seeking to minimize upfront costs and IT overhead. SOFTWRX deploys, manages and professionally maintains the software at a world-class hosting facility. There are no software licenses or hardware infrastructure to buy—which yields a dramatically lower cost of entry and shorter time-to-productivity.

## THE PROOF

Our facilities produce over 2 million cylinder heads annually. Controlling production levels, cost forecasting and raw materials costs were always difficult to manage with other systems. After 2.5 years we decided to convert to Softwrx because of the positive feedback we were getting from other automotive manufacturers using their services. The Softwrx support team had us converted and running within 90 days with solid performance. We can track shipments, interim financials, productivity levels, shop floor analysis, preventative maintenance controls and much more."

Patricia Henderson, *Financial Director*  
TEK Aluminum

"We have approximately 18 specialized retail locations and 3 warehouses in the southern US. After utilizing cumbersome spreadsheets, and deploying various POS software systems unsuccessfully, Softwrx provided us with a custom streamlined POS system targeted for our industry. Softwrx provides us with exceptional service and support as well as real-time inventory control and sales analysis so we can better service our customer deliveries."

Mark Hadden, *General Sales Manager*  
Southern Bedding Corporation

"Our physicians group found that most medical billing software did not offer much relief in the area of submitting patient claims. We also needed a way to stay current in HIPPA regulations and other governmental requirements. Softwrx provided solutions that streamlined those challenges. We also reduced our transmission cost to the insurance carriers. Softwrx has customized our medical billing software to fit our special needs. More importantly, our new system is scalable for future growth.

Dr. Stephen Boyd, *General Partner*  
Austin Medical Group
